

PROJECT STATISTICS

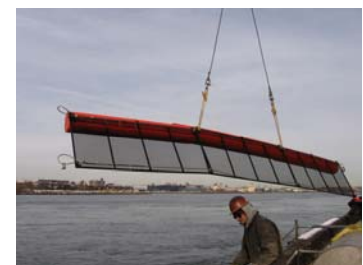

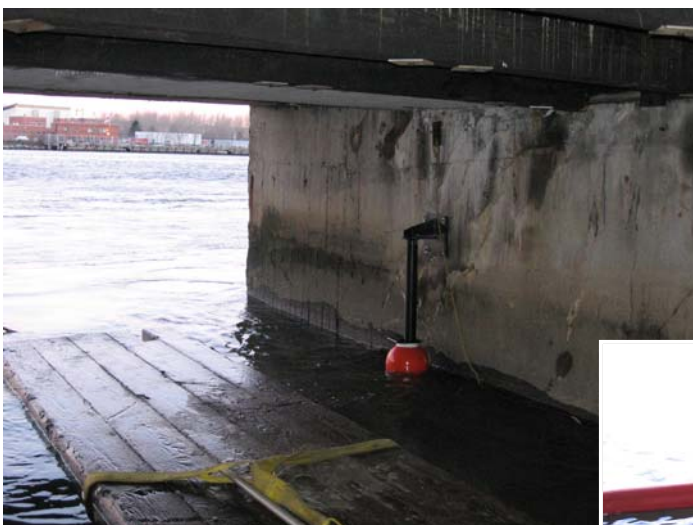

Project Name:	Astoria Generating Station
Location:	New York City (NY)
Owner:	ConEd
Description:	Debris barrier with underwater debris curtains and tidal riser system.
Date:	Jan 2006

Key Project Features

- 15' riser system, schedule 80 pipe, 5" dia.
- All metal components are epoxy tar coated.
- Booms have a 48" debris skirt underneath.
- Riser includes additional buoys to provide adequate buoyancy.
- Debris screens are connected to the bottom of the riser guide via dia 5/8" cable. This is done to prevent the screens from flipping horizontally during higher flows.

Installation by Weeks Marine.

Worthington Products, Inc. is the premier U.S. manufacturer of waterway barriers for security, safety and debris control. Governments and private enterprises use Worthington's waterway barriers worldwide.
