

PROJECT STATISTICS

Project Name:	Slab Creek Reservoir
Location:	Coloma (CA)
Owner:	SMUD
Description:	TUFFBOOM* Barrier line
Date:	1997

*The Camino reservoir is filled with 30 acres of big trees and debris.
"It's the most I've ever seen in 26 years."*

Superintendent,
SMUD's hydroelectric operations

**Tough debris problems
Require a TUFF BOOM...**

One has only to look at Slab Creek Reservoir on the South Fork of the American River near Camino to be reminded of Mother Nature's power. Following devastating 1997 floods, the reservoir behind Slab Creek Dam in the American River Canyon, operated by the Sacramento Municipal Utility District, was filled with pieces of homes, large and small trees and an assortment of debris - 30 acres worth.

The record river flows pulled anything and everything close to its banks into its raging path. At one point the river was 14 feet over the Slab Creek Dam's center spillway. The logjam behind the dam extended up-river nearly five miles.

Worthington designs its barriers to withstand even the most arduous conditions. From our closed-cell foam fill, to our tested and load-rated connectors you can rest comfortably with the knowledge that you've installed the best.

Worthington Products, Inc. is the premier U.S. manufacturer of waterway barriers for security, safety and debris control. Governments and private enterprises use Worthington's waterway barriers worldwide. Worthington Products offers full engineering and technical support, turnkey services and quality products backed by competent service.
