

# BOATBUSTER-20

## Heavy-Duty Debris Barrier

The **BoatBuster-20** Heavy-Duty Debris barrier was designed specifically barrier features submerged debris screens, optional above surface debris screens, high-load engineered connections, galvanized steel construction, high buoyancy engineered float cells and a proven design from the waterway barrier experts at Worthington. Individual segments measure approximately 22 ft (6.7 m) long and screen depths are per site specific conditions. The BoatBuster-20 is made in modular segments for ease of shipping and ease of assembly. This barrier is an all season barrier suitable for use in all seasons.

# BOATBUSTER-20

## Heavy-Duty Debris Barrier

### Features (At-A-Glance)

- Heavy-wall impact resistant polyethylene floats with max. UV resistance.
- Individual float units each provides 1,700 lbs (771 kgs) positive buoyancy via an unsinkable solid core of non-water absorbing foam fill.
- Engineered heavy-duty tubular steel frame designed for site specific conditions.
- Half-shell float design allows easy replacement of damaged float units without having to take the boom line out of service or replace a complete unit.
- Designed for continuous motion and heavy loads.
- Custom designs to satisfy site specific operating conditions.
- All connection hardware designed to be interchangeable and easily replaceable.
